- Poison Free Wasp & Hornet

Product Application Tips:

- Shake can well before using
- Hold can upright when using
- Saturate the nest
- Contact as many insects as possible
- As a precaution, test an inconspicuous area when treating vinyl or painted surfaces

Troubleshooting Guide

Problem:

Not effective

Possible staining

Possible Causes/Solutions:

- Thoroughly shake the can before using
- Always test a small inconspicuous area first when in doubt as the condition of vinyl siding and painted siding varies
- Any residue should dissipate shortly after application
- What appears to be stains are commonly confused with the product actually cleaning the siding where contacted
- If stain detected, wash area with warm soapy water

Notes:
